To the U.S. HHS department,
My comment on the proposed services for women is that it unjustly forces businesses, and by extension, employees, to pay for procedures they consider morally unacceptable, such as contraceptives that can cause abortion.

Also, the lack of exemption for employers that object on moral grounds is extremely regrettable. Please reconsider the inclusion of sterilizations and contraceptives in the list of required coverage items.

Sincerely,
Paul Barker
Alma, AR 72921
